

How to use the app

A simple guide for Bella Pizza staff

WELCOME

What is Ordermailing?

Ordermailing is the app you use at Bella Pizza to place orders with your suppliers. Instead of writing an email by hand each time, you simply open the app, pick the supplier, fill in the quantities you need, and click **Send**. The email goes out automatically.

Managers also use the app to see past orders, manage suppliers and products, and review job applications. This guide walks you through everything step by step — no technical knowledge needed.

**MAIN PURPOSE****Place orders**

Select a supplier, enter quantities, and send the order by email in a few clicks.

**FOR MANAGERS****Track history**

See all past orders, view statistics, and understand ordering patterns over time.

**ADMINISTRATION****Manage everything**

Add suppliers, manage products, invite new staff, and handle job applications.

Who can do what?

Every account has one of three roles. Your role determines which pages you can see.

Role	Who this is for	What you can access
Manager	Managers and administrators	Everything — all pages and settings
Staff	Regular team members who place orders	Home, place a new order, view orders, settings
Cashier	Cash-register staff	Home screen only (read-only overview)

12

1 Signing in and out

1.1 How to log in

Every time you open the app you need to sign in with your email and password.

- 1 Open the app. You will automatically be taken to the sign-in page.
- 2 Type in your **email address** and **password** .
- 3 Click **Sign in** . You will be taken straight to the home screen.

IF IT DOESN'T WORK

If you see an error saying "*Invalid email or password*", check that you typed everything correctly — passwords are case-sensitive. If you have tried several times and get locked out, wait a few minutes and try again.

1.2 Creating your account (first time)

You cannot create an account yourself. A manager must send you an invitation link first.

- 1 You will receive a link from your manager (usually by message or email). Open that link in your browser.
- 2 Fill in **email address** , **full name** , and **password** (at least 8 characters). Type your password a second time to confirm it.
- 3 Click **Create account** . You will be signed in automatically and taken to the home screen.

LINK ALREADY USED?

Each invitation link can only be used once. If you see an error saying the link is invalid or has already been used, ask your manager to send you a new one.

1.3 How to log out

- 1 Click **name or initials** in the bottom-left corner of the screen (inside the sidebar).

- 2 A small menu appears. Click **Log out** .
- 3 You will be taken back to the sign-in page.

2 The home screen

After signing in you land on the home screen. It gives you a quick overview of what's happening with orders today.

What you see	What it means
Greeting + date	A welcome message showing your name and today's date
Four number cards	Total orders ever made · Orders sent this week · Orders sent today · Unfinished orders
Yellow suggestion box	Suppliers you usually order from on this day of the week but haven't ordered from yet today. Click <i>Order now</i> to jump straight to that supplier.
Bar chart	How many orders were placed each day over the last two weeks. Hover over a bar to see the exact number.
Recent orders	Your last 7 orders at a glance. Click <i>View all orders</i> → to see the full list.

QUICK TIP

The big **New order** button in the top-right corner takes you directly to the order form. You can also use it from the left sidebar.

3 Placing a new order

Ordering is a two-step process: first choose your supplier, then fill in how much of each product you need.

3.1 Step 1 — Choose your supplier

- 1 Click **New order** (top right of the home screen, or in the sidebar).
- 2 You will see a grid of all your active suppliers. Each card shows the supplier's name and how many products they carry.

- 3 If you have many suppliers, use the **search bar** to find the one you need quickly.
- 4 Click the supplier you want to order from. The app moves to Step 2.

3.2 Step 2 — Fill in quantities

You will see a list of all products for the supplier you chose. For each product, enter how many you need.

How to enter a quantity

- Use the **+** and **-** buttons to increase or decrease the number. **Hold the button down** to change the number faster.
- Or simply **click the number in the middle** and type directly.

What the numbers mean

You enter **how much of each product you currently have in stock**. The app then automatically works out how much to order to reach the ideal stock level for that product.

PRODUCTS MARKED "MANUAL"

Some products have a yellow *Manual* badge. For those you always type the order quantity directly — there is no automatic calculation.

Your work is saved automatically

You don't need to press save. Every time you change a quantity, the app saves your work straight away. You will see a small indicator at the bottom of the screen telling you the status:

- **Saving...** — the app is saving right now
- **Saved** ✓ — everything is saved
- **Saved locally** — saved on your device (syncing to the server soon)
- **Offline** — no internet connection; your work is safe and will sync when you're back online

3.3 Let the AI suggest quantities for you

Not sure how much to order? The app can make a suggestion based on your past orders and Belgian public holidays.

- 1 In Step 2, click the **Generate Template** button (top right of the product list).

- 2 Wait a moment while the app thinks. A list of suggested quantities will appear.
- 3 Look through the suggestions. Some may have a small warning note — pay attention to those.
- 4 Click **Accept** to fill in the quantities **Reject** to ignore the suggestions
Suggestion automatically, or and fill them in yourself.

REMEMBER

The AI suggestion is a starting point, not a final decision. Always check the numbers before sending.

3.4 Review and send

- 1 Once you've filled in at least **Review** button at the bottom of the screen one quantity, the **order** becomes active. Click it.
- 2 A summary of your order appears — check that everything looks right.
- 3 You can add an **note** (for example, a special delivery instruction) in the text optional box at the top.
- 4 Click **Send order** . The order email is sent to the supplier automatically.
- 5 A green confirmation screen **New** if you want to place another order appears. Click **order** straight away.

3.5 Leaving without finishing

If you need to stop before sending, don't worry — your work is not lost. When you try to navigate away, the app will ask you what to do:

Option	What happens
Save & leave	Your order is saved as an unfinished draft. You can come back and finish it later from the Orders page.
Discard & leave	The order is deleted. Use this if you made a mistake and want to start fresh.
Stay	Nothing changes — you go back to filling in the order.

3.6 Picking up where you left off

If you saved an unfinished order and come back to the app later, a pop-up will appear asking if you want to continue.

- Click **Continue** to go back to where you were.
- Click **Discard** if you no longer need that order.

4 Your orders list

Go to **Orders** in the sidebar to see all orders — finished ones and unfinished drafts.

Filtering

Use the filter buttons at the top to show only what you need: **All**, **Drafts** (unfinished), or **Sent** (completed).

Opening an order

Click any order to open a detail view. You'll see the full list of products ordered, who placed the order, when it was placed, and any notes that were added.

Actions you can take

Action	When to use it	How to do it
Continue a draft	You saved an unfinished order and want to complete it	Click the pencil  icon next to the order, or open the order and click <i>Continue draft</i>
Resend the email	The supplier says they didn't receive the email	Click the resend  icon, confirm, and the email is sent again automatically
Delete an order	You want to remove an order from the list permanently	Click the trash  icon, then confirm. This cannot be undone.

EMAIL COULDN'T BE SENT?

If the automatic email fails (for example, because of a connection problem), the app will offer you a link to send the email yourself from your own email program.

5 Managing suppliers and products

Managers

only

Go to **Suppliers** in the sidebar. Here you can see, add, change, or remove the suppliers and products used when placing orders.

Working with suppliers

What you want to do	How to do it
Add a new supplier	Click the <i>Add supplier</i> button (top right). Fill in the supplier's name, email address, and make sure <i>Active</i> is ticked. Click <i>Add</i> .
Edit a supplier	Click the pencil  icon next to a supplier. Change what you need and click <i>Save</i> .
Deactivate a supplier	Edit the supplier and untick the <i>Active</i> box. The supplier will no longer appear when placing new orders.
Remove a supplier	Click the trash  icon. Warning: this also deletes all products linked to that supplier. This cannot be undone.

Working with products

Click on the product count (shown as a button on each supplier) to open the product list for that supplier.

What you want to do	How to do it
Add a product	Click <i>Add product</i> . Fill in the details and click <i>Add</i> .
Edit a product	Click the pencil  icon next to the product.
Change the order products appear in	Drag the  icon on the left of a product up or down to move it. The new order is saved automatically.
Remove a product	Click the trash  icon and confirm.

Product fields explained

Field	What it means
Supplier name	The name the supplier uses for this product on their own list or invoice
Our name	The name you use internally (what staff will see in the order form)
Ideal stock	How many of this product you want to have in stock at all times. The app uses this to calculate how much to order.
Manual order	Tick this if you always want to type the exact order quantity yourself, without any automatic calculation
Active	Only active products appear in the order form. Untick to hide a product without deleting it.

6 Managing staff accounts

Managers only

Go to **Users** in the sidebar to see everyone who has access to the app.

Inviting a new team member

- 1 Click **Add user** (top right).
- 2 The app generates a one-time invitation link. Copy it by clicking the copy button.
- 3 Send the link to your new team member (by message, email, etc.).
- 4 The link can only be used once. As soon as the person registers, it expires.

Changing someone's role

- 1 Find the person in the list and hover over their role badge.
- 2 Click the badge to open a dropdown and select the new role.
- 3 The change is saved immediately.

NOTE

You cannot change your own role. Changing a staff member to *Cashier* will limit them to the home screen only.

Removing a team member

- 1 Click the trash  icon next to the person's name.
- 2 Confirm in the pop-up. The person will no longer be able to sign in.

7 Order history and statistics

Managers only

Go to **History** in the sidebar to look back at past orders and understand ordering trends.

There are two tabs at the top: **Statistics** and **Product Lookup**.

Statistics tab

Choose a time range at the top: **Last 30 days**, **Last 90 days**, **Last 6 months**, or **All time**. Everything on the page updates to show data for that period.

What you see	What it tells you
Four summary cards	Total orders sent · Total items ordered · Average items per order · Your most-used supplier
Timeline chart	A bar for each day, week, or month showing how many orders were placed. Hover over any bar to see the number.
Top suppliers	Which suppliers you order from most, ranked in order
Busiest day of the week	Which day you place the most orders — useful for planning
Top products	Which products you order most in total quantity
Order log	A full list of all orders sent in the chosen time range

Product Lookup tab

Use this when you want to know exactly how much of a specific product you have ordered over time.

- 1 Set **start** and **end** — or use one of the quick shortcuts (Last 7 days, a **date** **date** Last 30 days, etc.).
- 2 In the product list on the left, tick the products you want to look up. You can search by name, or click **All** to select everything.

- 3 The results appear on the right: how many orders included those products, the total quantity ordered, and the average quantity per order.
- 4 Scroll down to see a breakdown order by order, with date, supplier, and quantity.

8 Job applications

Managers only

Go to **Applications** in the sidebar. When someone applies for a job at Bella Pizza through the website, their application appears here automatically.

Finding an application

- Use the **search bar** to find someone by name, email, or phone number.
- Use the **status dropdown** to filter by stage: New · In progress · Accepted · Rejected.

Reading an application

Click any application to open the full detail. You'll see:

- Personal information (name, date of birth, address, phone, email, civil status)
- Administrative details (national register number, bank account)
- Language skills (Dutch and French levels)
- Motivation and hobbies

Updating the status

Change the status to track where each candidate is in the hiring process:

Status	When to use it
New (grey)	Just arrived — not yet reviewed
In progress (blue)	You're actively reviewing or interviewing this candidate
Accepted (green)	You've decided to hire this person
Rejected (red)	You've decided not to proceed

You can change the status from the list view, or from inside the detail view.

Deleting an application

Click the trash  icon (from the list or inside the detail view) and confirm. This permanently removes the application.

9 Your personal settings

Click **Settings** in the sidebar to adjust your personal preferences.

Setting	What it does
Your name	Change the name displayed in the app and on orders. Type your name and click <i>Save profile</i> .
Password	Change your password. You'll need to enter your current password first to confirm it's you.
Language	Switch the app between English GB and French FR . The whole app changes language immediately.
Dark mode	Switch between a light and dark look for the app. Useful in low-light environments.
Import suppliers Managers only	Upload a file to add many suppliers and products at once. This is useful when setting up the app for the first time.

Changing your password

- 1 Scroll to the *Password* section.
- 2 Type **current** , then **new** , then your new password again your **password** your **password** to confirm.
- 3 Click *Change password* . You'll see a green confirmation when it's done.

PASSWORDS DON'T MATCH?

If you see an error saying the passwords don't match, make sure you typed the same new password in both fields.
